

Online School Management Suite

ONLINE SOLUTION

No equipment to purchase or maintain. Simply access your system online either at the office or at home. Adding and maintaining data is done through a secured portal to ensure safety and success.

WEBSITE INTEGRATION

Your new school management system, homework central, and hot lunch programs integrate directly into a public website, allowing parents, teachers, staff, and students to log in and access their information and to maintain their systems.

AFFORDABLE

The pricing for the products are affordable and based upon your student enrollment. Our desire is to be a partner in your schools success and growth.

Online Secure Solution

Hot Lunch Program

Homework Central

Daslos Studios is proud to announce the release of its 2011 School Management System and Hot Lunch Program. All of our tools in this package are complete internet solutions meaning that you are able to access from any computer tied to the internet. We are able to offer this as a complete package or implement any one or more of the tools in this suite. Our code and your data are backed up daily to ensure your data remain safe.

We use Enterprise Class tools and code in our solutions by utilizing the latest in technology by Microsoft. Our code is built to be customizable to match our client's needs and to allow expansion to meet future demands.

We continue to work with our clients to continually improve everyone's solution. This concept means that your investment in us will continually benefit you more as time moves on. We encourage the discussion of our products as we know that you are the experts of what you need. Your success in managing the school systems, retrieving the information you need, generating reports and other notification methodologies, quickly and easily is our goal.

CONTINUAL UPGRADES

Our online solution is always evolving based upon input and requests from our clients. This is a living solution what is constantly changing to meet your changing needs. A list of new features in the upgrade, as well as how to use them are published prior to the release of any new functionality.

CUSTOMIZATION

We can alter any of our standard products to mimic your environment and requirements if they differ from our standard package.

PARTNER IN SUCCESS

We are here to help in all phases of your solution. As our solution is always growing to meet your needs and ideas, we never consider this job done. We are tied to your success and would like you to consider us a partner in your upcoming challenges, growth, and overall success.

Suite Features and Overview

School Management CRM

The Contact Relationship Management (CRM) system is a dynamic online database which will store, search, edit, communicate, and report on your students, faculty, parents, and prospective new admissions. This is the central brain to the system, and the simple interface allows you use it without any technical skills. You are able to store, track, and search upon unlimited fields. If you can think of it, you can save and search it.

Hot Lunch Program

This online lunch solution allows you to take your lunch program paperless and make the countless order forms a thing of the past. Administrators simply enter the meals into the system while parents and students will be able to view the meals from home, make their orders, view their past orders, and even pay for their meals online. The advanced reports allow teachers and staff to know which child ordered what, and recent expansions allow for forgotten lunches, missed lunches, and more.

Homework Central

Homework central is an online resource for your teachers and students. Your teachers are able to post text, images, or documents online for their students to use. Students and parents will quickly be able to find their class and view their assignments. They will also be able to see an archive of past weeks postings in case they missed something.

E-Mail Newsletters

Keep in contact with your students, parents, faculty, and staff using E-Mail newsletters. Using CRM you are able to target your recipients by any field and send them as many E-Mails as you would like. Encourage prospective admissions with E-Mails targeted to the interests of the parents and students with unlimited groups. E-Mails are graphic HTML messages with your brand, customized for your school. Track the open rates of messages as well as hyperlink clicks automatically with no effort.

NEW SERVICES COMING SOON
