

# Antimicrobial Faucets with SteriTouch<sup>®</sup> Technology

For HFSLT & HFSFT faucets for bottled water coolers & liquid containers

- Tomlinson's HFSLT and HFSFT have SteriTouch technology built-in to last the life of the faucet
- SteriTouch technology inhibits bacteria growth on the faucet
- Faucets are NSF listed to NSF/ANSI Standard 169
- Customers benefit from antimicrobial protection on the faucet

## About SteriTouch Technology:

- The active components of SteriTouch have EFSA and FDA approval and are EPA registered
- Ionic silver-based compound manufactured into the product
- Operates by several modes of action to attack the microbe and reduce growth on a surface
- Silver is a natural antimicrobial that has long been used as a way to prevent contamination on a surface

The HFSLT and HFSFT faucets are self-closing faucets designed for use where a fast flow and compact unit is required. In addition to water, other dispensing applications include juice, wine and cold and hot beverages up to 170°F (77°C).
