

Stainless Steel Mesh Safety Gloves Sizing Guide

Glove Size	Traditional Glove Size	Hand Circumference*
Ex-ex-small	5 - 5.5	127 mm
Ex-small	6 - 6.5	152 mm
Small	7 - 7.5	178 mm
Medium	8 - 8.5	203 mm
Large	9 - 9.5	229 mm
Ex-large	10 - 10.5	254 mm

* Hand circumference is measured around the full hand at the top point of where the thumb joins the palm.

Stainless steel mesh safety gloves are not designed to be worn tightly in order not to interfere with flexibility and dexterity. Therefore, at least 5 mm should be added to the actual hand measurement to determine the recommended glove size. If fabric glove liners are worn underneath the mesh safety glove, an additional 2-3 mm should also be added.
